Senior Software Engineer, Viola Service India Private Limited – Since August 2017

[Viola Black](#) is the free everyday current account and prepaid card for everyday people. As part of Viola Money, we believe that money management should be a necessity, not a privilege. No matter who you are, where you are from or how much you earn, opening and using your Viola Black current account is simple, exactly how managing your money should be. Open your account for free with a straightforward ID process. All you need to open your Viola Black current account is a government-issued identification document such as a passport or a UK Driving Licence and proof of address and you are good to go!

Email : yegireddi.sateesh@gmail.com**Phone :** [+91 8801376677](tel:+918801376677)

[ViolaBusiness](#) is an account designed to help manage a businesses money better, anywhere in the world. Unlike the banks, we speak to our business customers like humans, we don't have any hidden fees and we put technology at the heart of everything we do. Providing business owners with a bank account with a pre-paid debit MasterCard, that can be used anywhere in the world. Our cards will be held in multiple currencies with GBP, Euro and USD which offers the perfect solution for International Business. A business will be able to open and manage a bank account online which saves administration time and visits to a local branch. The app means the control you account is at your fingertips with real time notifications to of any spend.

[Viola Family](#) provides children can receive funds via their own prepaid card and learn to manage their own money responsibly. Children can use their prepaid card in store and online (accepting Mastercard®) but will never be able to go overdrawn because they can only ever spend what is available on their card. To help manage their money more effectively children can access their very own app and can request a top up from the main account holder, check their balance, can see where they have spent their money and lock and unlock their card if they happen to lose it. In order to access this app, the Viola Black app must be downloaded first by the parent and a child's account needs to be registered. Once approved, a child's prepaid card will be issued, and your child's login details can be used to sign into their own Viola Family app. From the Viola Black app, the parent can add up to four children's accounts. From one dashboard, the parent can transfer money to each prepaid card. It is the responsibility of the main account holder to ensure a child's prepaid card is used in the correct manner. Viola Family is a great tool for both parents and children. It provides parents complete peace of mind and full control and is a great platform to teach children how to manage their money in the modern world.

[Viola Wallet](#) is a new payments wallet in India and it will replace your physical wallet and simplify your financial experience. Anything financial that can be done with your physical wallet, can be done in real-time, securely and with more value for your money. Viola Wallet is not just another wallet, first of its kind, completely digitised next generation wallet service.

Roles & Responsibilities:

Develop the application along with the team members using Agile methodology, attending Scrum meetings and collaborative with all teams to discuss the next development process.

Setup the project base in MVC architecture, develop User Interface and validate UI designs and suggest UX and CX, provided full security for user data using Keychain and best encryption methodologies.

Developed the major features in Viola Wallet like mobile & DTH recharges, bill payments, buying and selling gold, bus bookings.

Integrated Device Check API and helped backend team to restrict the number of installations of the app into a single mobile device.

Responsible for saving wallet data like transactions, billers, booked tickets and other information into Core Data.

Technologies: Swift, MVC, XCTest, Gitlab CI/CD, Fastlane, Fabric, Google Analytics, Agile, JIRA.

Email : yegireddi.sateesh@gmail.com**Phone :** [+91 8801376677](tel:+918801376677)**Software Engineer, Kellton Tech Solutions Limited, Hyderabad – April 2015 - July 2017**

[Club Mahindra](#) mobile app is mainly developed for booking the holidays in Club Mahindra resorts with the mobile. This application also provides the information about resorts, which are located across mountain or coastal cruise in the world. Members can also get in touch with in-resort representatives and discover all the activities and events that they can enjoy. This application also provide exciting booking offers that will surely make enjoying the holiday even better. And now, members avoid long queues and forms at the reception desk when they arrive at the resort by filling in the details on the Club Mahindra mobile application 48 hours before you check-in. Just need to show ID and get the keys to their room.

[DLAppTap](#) allows your guests to shop whilst they stay in your hotel. If they like the furniture, lighting, flooring, accessories, toiletries etc then they may tap the items whilst in the app and this will add it to their basket. Smaller items such as toiletry sets can be taken home upon checking out and larger items can be delivered directly to them via DLAppTap's unique database of products customised for your property and directly from the supplier. Everything purchased within the app will have a commission reserved for the Hotel.

[Design Life](#) app uses smart image recognition technology to help you source furniture, accessories, fabrics and lighting that you see in your everyday life. This app allows you browse, get product details and purchase millions of products available at Design Life. Add them to your cart, edit the items and checkout there. Powerful payment module will guarantee that are in charge of every detail of your money transactions. Get alerts of new payments in real time.

[Young's Rep](#) app is primarily designed to enhance customer satisfaction and knowledge. Users see best sellers, sale items and easily place orders, track your shipments, add items to cart or wish list, contact your sales rep, access your invoices and open orders, see count sheet and review past purchases, update your addresses and other information, make payments, file claims, download catalogs, receive notifications and promotions.

[Young's Sales Rep](#) app is primarily designed to help our sales reps take care of our customers. This app distributes products to a wide variety of specialty card, gift retailers, garden centers, hospital gift stores, home décor boutiques, as well as mass-market chains and direct mail retailers. Using this app, representatives can get up to the second status on all the items, review best sellers, download catalogs, see the current specials and take quotes for both new and current customers.

Roles & Responsibilities:

Develop the application along with the team members using Agile methodology, attending Scrum meetings and collaborative with all teams to discuss the next development process.

Develop User Interface and validate UI designs and suggest UX and CX, provided full security for user data using Keychain and best encryption methodologies.
